Profile

Fullstack Developer (React-Redux)

With the desire to become a great developer passionate about what I do, I enjoy learning to improve my knowledge and perfect it discover new things, as well as learn new technologies or easier methods for my work and develop my personal projects such as my portfolio website where one day I hope to be able to offer professional services.

I have the ability to develop web pages, HTML5, CSS3 and JS, use of Media Query for mobile responsive development and Keyframes for HTML5 animations. Front-end development with React, Redux, Firebase. Lorem Knowledge of backend to make web applications that use databases or REST APIs.

Programming Skills

HTML5 Advanced	CSS3 Advanced	SASS Advanced	JAVASCRIPT Intermediate
JQUERY Essential	REACTJS Intermediate		
PYTHON Intermediate	NODE.JS Intermediate	ASP.NET Essential	JAVA Essential
SQL Intermediate	MONGODB Intermediate	FIREBASE Intermediate	
BASH Intermediate	GIT Intermediate	GITHUB Intermediate	GITLAB Intermediate
SCRUM Intermediate	TRELLO Advanced		

Design Skills

Premiere Pro Advanced	After Effects Advanced	Illustrator Advanced	Photoshop Intermediate
--------------------------	---------------------------	-------------------------	---------------------------

Hands on experience

Web Portfolio (Jan 2021 - present)

I am currently working on my web portfolio gsdesign.com.co. In it I mainly show my skills with web development and graphic design. I built the project with HTML5, CSS3, and JS, but I am refactoring the code and using the REACT framework and Firebase as a database to improve the experience, make the page easier to maintain, and upload regular updates. I also used Redux for improved authentication and data management, and an added ease for uploading updates through a dashboard available only to a user with an administrative role.

Hackathon TIC 2.0 (October 2021)

A virtual assistant for the care of older adults, the winning project of the Hackathon TIC 2.0 We developed the idea of a virtual assistant capable of working in a similar way to those integrated in smartphones. This application remembers the hours of medication and supplement administration scheduled by the caregiver, makes nutrition suggestions, and, thanks to artificial intelligence, learns from the data it collects to improve performance.

Trainee Fullstack developer 4Geeks (Jan 2022 - May 2022)

I worked as a full stack developer in https://4geeks.io/, for an e-commerce https://tenndo.com/. The tasks that I realized consisted of solving the problems that the clients presented primarily in the frontend, and the technologies that I used on this project were REACT framework, JavaScript, Python, WSL, Bash, Docker.

Freelance (Jan 2020 - present)

I have worked on different graphic design and web development projects. The latest projects are:

Ecotravel Tamarindo

I developed an e-commerce page for a travel agency in Costa Rica called Ecotravel Tamarindo. I built the web page with the Wordpress CRM, I also redesigned the company logo.

E-commerce

I'm working on an online store project built on React/Redux, Firebase and Paypal payment gateway integration.

Education

Software development for web applications	abr 2021 - dec 2021
Universidad de Caldas, Colombia	
Web Development School	dec 2021 - present
Platzi	

Courses

Python Fundamentals	may 2021 - dec 2021
CISCO Networking Academy - Netacad	
SCRUM Fundamentals Certified	sep 17, 2021
ScrumStudy
